Repositório GIT:

The image shows a dual-screen setup on a Mac OS X desktop. The top screen displays a GitHub repository page for 'jpml/pucMBACloud'. The repository is public and contains a README.md file. The bottom screen shows a terminal window with a zsh shell running on port 9823. The user is performing a git pull operation, which updates the local repository. The terminal also shows the user's .gitconfig file, which includes settings for credential helpers and remote tracking.

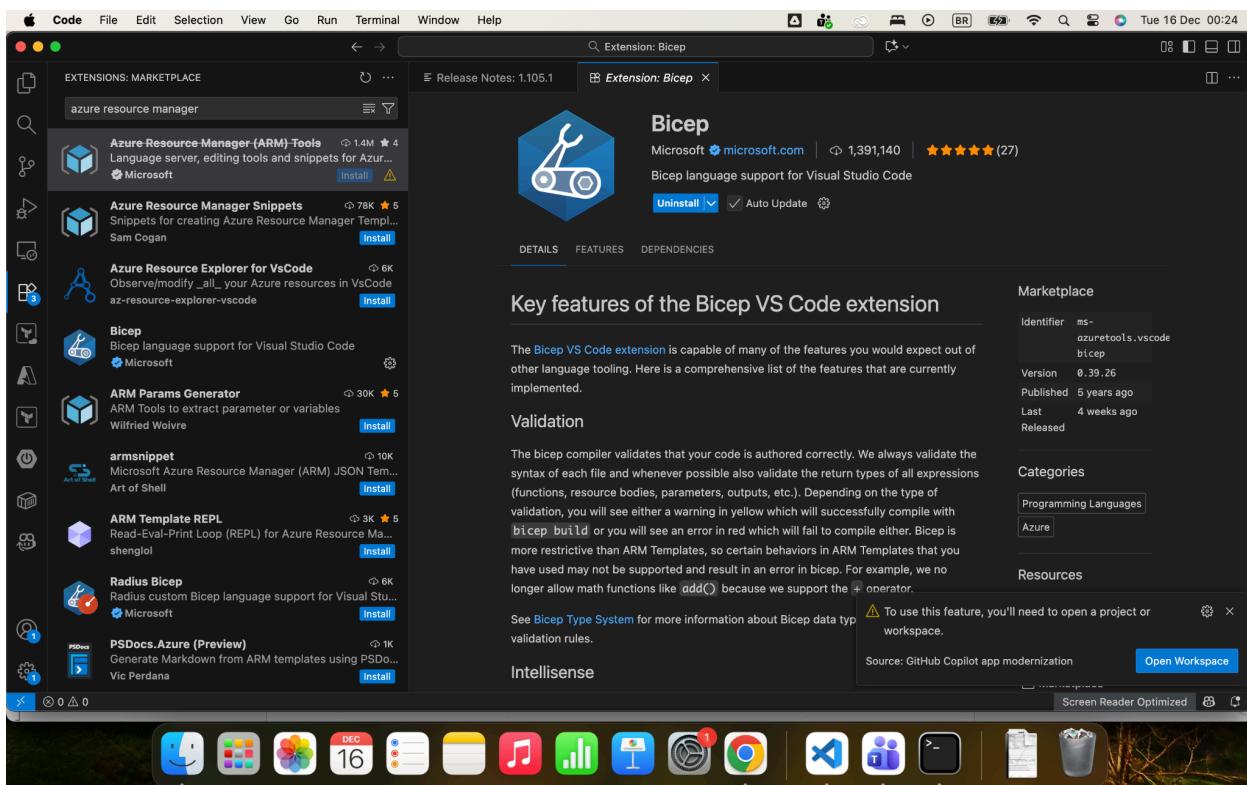

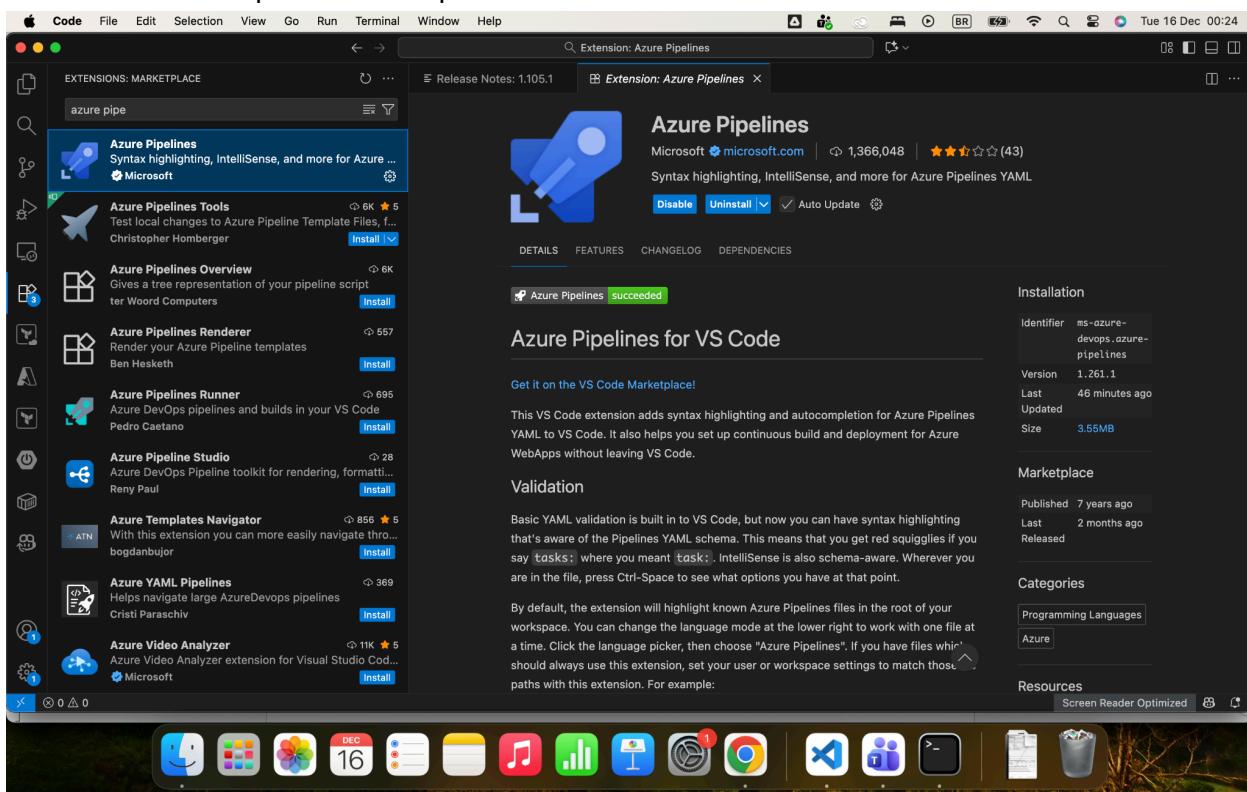

GitHub Repository Page (Top Screen):

- Code tab:** Shows a 'Start coding with Codespaces' section and a 'Add collaborators to this repository' section.
- Quick setup:** Provides instructions for setting up the repository via desktop or command line.
- Terminal (Bottom Screen):**
